DETOX AND THE LATEST MEDICAL APPROACHES

Even though our primary goal is to end the struggle of an addiction through abstinence, we realize that for some this may not be possible. What makes Searidge stand out is we understand some may need further guidance with anti-drug addiction medication. We work with caring physicians, psychiatrists and nurses that will give you compassionate care in a non-judgemental environment.

EFFECTIVE THERAPY

Effective evidence-based therapy that works is the core of our addiction recovery program. At Searidge we combine both traditional addiction treatment approaches as well as alternative approaches for best results.

**Traditional Approaches**
- Behavioral therapy
- Cognitive Therapy
- Psychodynamic Therapy
- Smart Recovery
- Nutritional Therapy

**Alternative Approaches**
- Creative Arts Therapy
- Native Healing
- Meditation and Yoga
- Recreational Therapy

COMFORT & PRIVACY

We all respond best to comfortable unstressed environments. Searidge offers clean, private, well appointed and comfortable rooms where you get the privacy and peace to focus on what counts.

OPTIONS THAT WORK

For successful drug addiction recovery, Searidge helps you identify the root causes of addiction. We teach new and healthy coping strategies and give you tools to successfully live with the demands and responsibilities of a drug and alcohol-free daily life. It is best to leave your environment temporarily as you focus 100% on addiction recovery. To meet the diverse needs of our residents, we offer drug addiction programs for 30, 60, or 90 days. This is the time and place where you need to focus on the most important person: YOU.

Mission Statement:

At Searidge we look beyond your addiction to help you become the person we know you can be. We commit ourselves to helping you find a better life that is waiting for you.
